In the Miami Inspiration Ore Belt.

Over 500 stockholders in MIAMI MOTHER LODE MINING CO. average 400 shares each, held in Miami alone. Stock opened at 50c, closes at 50c, prior to going on curb

Extracts from directors' meeting as copied from Arizona Record, October 4th.:
"Directors instructed President and General Manager to place stock on Curb at once."

Extract from Mining Report, Page 7:
Referring to a smelter return from the O. D. Smelter. "The ore from this shaft (Cracker Jim) returned 35 7-10 copper, 2 ounces silver and a trace of gold."

A proven mine without a hanging wall on the 100 foot crosscut at 150 foot level. Thoroughly equipped with hoisting engines, blacksmith, machine and timber frame shops, several houses, boarding house, compressor and air drills. The Miami Mother Lode has amply proven that the immense ore-bodies of the Miami Copper Co. and Inspiration Copper Co. are not confined to their own side-lines. A few hundred people in Arizona and numbers in Bisbee know the extent and richness of the Five Points mine (now through consolidation embodied in the Miami Mother Lode Mining Co.) The Warren District allotment now less than 30,000, is the last issue prior to stock going on the curb; in fact, the only issue outside of Miami and Globe, and will be drawn upon for Douglas investors.

(Cheques may be left at any bank in Bisbee)

Personnel of Directorate:

H. E. Bragg, wholesale shoe manufacturer, St. Louis.
H. W. Foust, financier, Kansas.
William Schafer, mining engineer, formerly with Guggenheims.
F. W. Solomon, Supt. of Miami Copper Co. Mills.
A. Reid, realty and insurance.
G. D. Barclay, mayor of City of Globe.

Main Office:

Miami Mother Lode Mining Co.
